Post-Operative Instructions for Fillings

- After you have fillings placed, it is not unusual for you to experience soreness of the mouth.
- Dr Green only places tooth colored porcelain fillings. Therefore, you should not experience hot or cold sensitivity.
- Because you were numbed for your appointment, it can be difficult to tell if your bite is correct. After the numbness wears off, if you feel like your teeth are not biting together correctly, please give us a call.
- Normal eating and drinking can be resumed as soon as the numbness wears off.

If you have any questions or concerns, please do not hesitate to give us a call.
